for a sustainable future

FLAKE FLOORING

Achieve  
an **eye-catching look**  
along with  **durable,**  
 **long-lasting protection!**

Customize the look of your floor  
by choosing:

- the color of the floor coating to be applied
- the color of the flakes
- the size of the flakes
- the broadcast density

## Decorative flake flooring

**ISOMAT**'s decorative flake flooring is an utterly unique and ultra-modern option for both residential and commercial properties. For its application, **ISOMAT DECO-FLAKES**, also known as color chips, are sprinkled onto the fresh polyurethane or epoxy floor coating surface and finally the system is sealed with transparent topcoats.

### **ISOMAT DECO-FLAKES**

add character  
and visual  
interest  
to plain  
waterproofing  
layers or resin  
floor coatings,  
making them  
stylish and  
utterly unique!

### **ISOMAT's flake flooring has numerous benefits:**

- Easy and fast installation with minimal thickness - ideal for renovations
- Elasticity and resistance to tear and wear
- Waterproofing solution for flat roofs, balconies, etc.
- Exceptional UV-stability, non-yellowing properties
- Smooth, monolithic finish with little-to-no maintenance
- Helps hide dirt and imperfections compared to monochromatic surfaces
- Unique, visually appealing look
- Resistance to common household cleaners, oils, and seawater
- Suitable for pedestrian and vehicular traffic

Due to printing processes, the color combinations shown here aside may vary from the end-result and are for illustration purposes only.
